DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Invention I in the reply filed on August 01, 2005 is acknowledged. The traversal is on the ground(s) that "the claims are so directly related to each other that it is believed that all of the claims may properly be included in the same application". This is found persuasive; therefore, the restriction requirement has been withdrawn.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 3. Claims 1-15 are rejected under 35 U.S.C. 102(e) as being anticipated by Cameron et al. (2003/0055735 A1).

Cameron et al. discloses an on-line selling system and method comprising:

a sale processing system including a Web site that has a function of accepting an order made from a user's terminal (105) and that can process a delivery of an item of goods the order for that has been accepted as well as a settlement of a goods-item sale price in association with the acceptance of the order (via micropayments) (as illustrated

Art Unit: 3627

in Figure 3), a goods supply system that supplies an item of goods with respect to the sale processing system, wherein the goods supply system is provided therein a program-providing device that provides a selling program for selling the item of goods to be supplied from the goods supply system to sale processing system (page 22, [0243]), and the selling program causes the user's terminal that has made access to the Web site to display on a monitor thereof a process of selecting and buying an item of goods to be supplied from the goods supply system association with user's operation with respect to the user's terminal, and causes the user's terminal to transmit an order for the item of goods bought through the process to the sale processing system (pages 49 and 50; [0344]-[0350]).

Cameron further discloses that the selling program is written in a WWW scripting language and is provided from the Web site to the user's terminal to thereby be executed on the user's terminal in association with a Web browsing program [0145] and [0182].

Cameron further discloses the selling program is configured to execute a prescribed piece of lot-drawing processing to thereby determine an item of goods to be sold the user (via displaying a menu and selecting item from the vending machine using the portable device).

Cameron further discloses the Web site has a function of causing the user's terminal that has made access thereto to display on the monitor thereof a Web page containing therein a prescribed image associated with execution of the selling program, and the selling program is executed in response to a user's selecting operation

performed with respect to the prescribed image (¶s [0344-0349]). The selling program causes the user's terminal that has made access to the Web site to display on the monitor thereof an image vending machine and causes the user's terminal to transmit the order for the item of goods to be supplied from the goods supply system to the sale processing system through a user's prescribed operation associated with the image of the vending machine (¶s [0209], [0348-0351]).

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yuen, Bernard et al., McGarry et al., Johnson, and Lee are cited for operating a vending device remotely using a portable device.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lynda Jasmin whose telephone number is (571) 272-6782. The examiner can normally be reached on Monday- Friday (9:30-6:00) with Thursday Telework.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Alexander Kalinowski can be reached on (571) 272-6771. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
